Forecast for Monday 29 Jul 2024

Weather: Some mist and fog patches are likely to develop in the valleys overnight, otherwise fine and dry with clear spells during the early hours. Any valley mist and fog patches will rapidly clear after dawn, to leave a dry day with variable amounts of cloud, but plenty of sunny spells are likely. Perhaps some valley mist and fog patches re-forming towards midnight.

Chance of cloud-free hill tops above 800m: Near 100%.

Low Cloud and visibility: Visibility mostly very good, with clear views of distant hills. Very poor in any valley fog, leading to some brief and temporary deteriorations as fog lifts and breaks after dawn.

Forecast for Monday 29 Jul 2024

Height (m)	Wind Speed mean/gusts (mph)					Wind Direction (blowing from)			
	00:00	03:00	06:00	09:00	12:00	15:00	18:00	21:00	00:00

*Level above which ground is expected to be frozen/snow is expected to settle.

Meteorologist's View

Plenty of sunny spells leading to a warm and rather humid day for many with high UV levels so sun protection and adequate hydration is recommended. Despite this, it is likely to feel chilly on the higher summits in the wind.

Forecast for Tuesday 30 Jul 2024

Weather: Perhaps some early mist and fog patches in the valleys, these soon clearing after dawn. Then another fine, dry and increasingly warm and humid day with high UV levels once again.

Maximum wind: Northerly or northeasterly 10-15 mph, gusting 20 mph.

Chance of cloud-free hill tops above 800m: 80%

Low Cloud and visibility: Visibility mostly very good, with clear views of distant hills. Very poor in any valley fog, leading to some brief and temporary deteriorations as fog lifts and breaks after dawn. Perhaps some patches of cloud, base 500-700m, in the north of the Park for a time.

Temperature: **Valleys:** Plus 10C becoming plus 23C
 At 800m: Plus 14C
 Freezing level: Above the summits.
